Which connection options are available?

Connections · https://www.smarteye.eu/docs/which-connection-options-are-available/

We deliver our services directly on an individual basis or at a special tariff **through the landlord** starting from **8 subscriptions** at one installation address.

There are **2** connection options depending on what installation the **landlord** has chosen:

- **Wired connection**: stable and super fast
  To connect your device to the wall outlet, you need to bring your own UTP network cable.
- **Wireless connection** (Wi-Fi): flexible access to the Net

Please note! *The use of USB Wi-Fi adapters/dongles is not supported as this type of adapter often doesn’t offer good Wi-Fi reception.*
